

# GLOBAL ENERGY SHOW

EXHIBITION & CONFERENCE  
shaping the future of energy

co-hosted by

**cenovus**  
ENERGY

JUNE 9-11, 2020  
CALGARY, CANADA

## NORTH AMERICA'S LEADING ENERGY EVENT

EXHIBIT  
AT THE

METHANE  
EMISSIONS  
LEADERSHIP  
ALLIANCE  
PAVILION

The Methane Emissions Leadership Alliance (MELA) Pavilion will be a key feature at the Global Energy Show and will align perfectly with the broader scope for which the event now encompasses. The pavilion will bring together the various products and services, including innovative technologies, to support the over-arching mandate of MELA: to reduce methane emissions.

### KEY PRODUCT AND SERVICE AREAS INCLUDE:

- Glycol Dehydration
- Pneumatic Devices
- Leak Detection & Repair / Fugitive Emissions
- Compressors
- Combustion / Power Generation
- Measurement and Reporting

Over the three days of the Global Energy Show, the MELA Pavilion will include dedicated exhibitors showcasing their products and services in the key areas. In addition to the exhibitors, the pavilion will feature a theatre presenting technical sessions as solicited and vetted by MELA.

The MELA Pavilion will be hosted in Hall A of the BMO Centre in the heart of the main exhibition hall at the Global Energy Show.
